To Valuable Customers and Partners

Chuo Denshi Kogyo CO., Ltd.
President & CEO
Hiroaki Yoshida

CDK Opens Tokyo Design Center (TDC)

Thank you very much for your support of our business.

Since December 2015, CDK has entered the global market by introducing our own brand RF products, and has achieved this new segment of sales increase by 400%, compared with the previous years. Especially Low Noise FETs for satellite broadcasting, we are succeeded in 280 million pcs of shipment and 40% of W/W share over the past two years.

We are very pleased to announce to open Tokyo Design Center (TDC) on July 1st, so that we can expand our business to new business area such as IoT/Telecommunication device.

We open TDC to expand Satellite office Tokyo and to enhance design resources for ease of access to key-customers and key-partners around Tokyo area. TDC starts with 7 staffs, expands 20 sales and engineers within 2018 and get 1 billion sales by IoT/Telecommunication device.

At the same time, we will encourage strategic alliance (containing joint development) with end-product customers, testing house partners, foundry partners and academic institutions, in order to explore IoT/Telecommunication business.

We are excited to continue serving you from the new location. Please accept our sincere gratitude for your continuous support. And best wishes in your future business endeavors.
